A200 A300

Features

- No contact between operating components in the casing
- Flat power curve over entire vacuum range prevents motor overload
- Reduced stress on motor shaft and bearings
- Increased water handling capability prevents heat build-up, extends life of mechanical seals
- Compact, close-coupled design eliminates need for inter-stage manifold or motor alignment
- Shrouded rotor increases pumping efficiency for high vacuum and low water consumption
- Fast delivery on standard materials and local support

Typical Pumping Speed Curves

Performance curves are based on dry air at 68°F (20°C), 60°F (15°C) seal water, and 29.92 inches of mercury (760 torr) barometric pressure.
